

ELEGBEDE RAYMOND

Fullstack Engineer · Frontend-Heavy

Lagos, Nigeria · elegbede.raymond@gmail.com · monds.xyz · linkedin.com/in/raymond-elegbede-40a446195 · github.com/m0nds

SUMMARY

Fullstack engineer with 5+ years of frontend experience and active backend development. Specialise in complex React/TypeScript applications — enterprise SaaS, investment dashboards, and real-time interfaces. On the backend, I design production-grade REST APIs with authentication, RBAC, encryption, WebSockets, background jobs, and automated tests. Comfortable owning full product slices end-to-end and shipping clean, tested code on tight timelines.

WORK EXPERIENCE

Fullstack Engineer · Hospital Booking System (NDA · Contract · Remote)

May 2026 – Jul 2026

Confidential healthcare SaaS platform — details withheld under NDA.

- Built a production-grade clinic management REST API (Node.js, Express, TypeScript, PostgreSQL/Prisma) with JWT auth, refresh token rotation, Redis blacklisting, and email verification.
- Architected 4-role RBAC (Patient, Doctor, Receptionist, Admin) with AES-256-GCM field-level encryption on all sensitive medical data and an immutable audit log enforced via PostgreSQL trigger.
- Implemented real-time notifications via Socket.io + Redis pub/sub, Bull queue for async email processing, and node-cron for appointment reminders.
- Load tested at 937 req/s · p95 9ms · 0% failure under 100 concurrent users. Redis caching delivered 53× faster responses. 36 automated tests (Jest + Supertest) with GitHub Actions CI/CD.
- Integrated the API on the frontend using React, TypeScript, TanStack Router, TanStack Query, and Zustand — delivering a seamless full-stack product.

Software Engineer · AfriStakes (Contract · Remote)

Feb 2026 – Apr 2026

Structured capital platform connecting African businesses with investors.

- Built the majority of the frontend from scratch — real-time deal updates via WebSockets/Pusher, complex investment dashboards with TanStack Table, and type-safe routing with TanStack Router.
- Wrote component and integration tests, optimised rendering for data-dense views, and delivered all milestones independently on a tight contract timeline.

Frontend Developer · Stratsight (Strategy SaaS)

Jun 2024 – Jan 2026

Enterprise strategic planning and performance management platform for C-suite teams.

- Architected MissionSync from scratch — 190+ React components, 97+ pages, 50K+ LOC using React 18, TypeScript, Redux Toolkit, and React Query.
- Built AI-powered features with streaming responses, dual API versioning (V1/V2), and a 190+ component Tailwind library that cut code duplication by 40% and accelerated delivery by 30%.
- Achieved 25% faster load times via code splitting, lazy loading, and caching. Deployed via Netlify with PostHog analytics and full error boundary coverage.

Software Developer · Simonsaysdrip

Nov 2023 – Apr 2024

Fashion e-commerce brand with full online retail operations.

- Built full-stack e-commerce features (React + PHP) — browse, cart, checkout, payments. Achieved 95 Lighthouse score. Integrated Shopify API for catalogue and inventory management.

Frontend Developer · Bluelight Agency

Apr 2020 – Jan 2023

Digital product studio delivering web solutions across multiple industries.

- Built responsive web applications for diverse clients using React.js, GSAP, and Framer Motion. Cut development time by 25% through reusable component libraries. Improved UI performance by 20%.

PROJECTS

AfriStakes — afristakes.com · Lead Frontend Developer

- Investment platform — TanStack Table dashboards, WebSocket/Pusher real-time updates, TanStack Router. Stack: React · TypeScript · TanStack Router · TanStack Table · WebSockets · Pusher

Folaweji Laundromat — folaweji.com · frontend developer (contributor)

- A platform that provides world-class laundry experience with self-service facilities, coin-operated machines, and mobile app integration. Stack: React · TypeScript · React toolkit · Ionic

Beeva AI — beeva.ai · Frontend contributor

- AI skincare platform — selfie upload, personalised skin analysis and care recommendations. Stack: React · TypeScript

BuildPanda — buildpanda.io · Fullstack Contributor (Team)

- Construction OS covering the full build lifecycle — proposals, estimates, milestones, verified payments, and independent inspections. Contributed across both frontend and backend development as part of the team.

MediCore Healthcare API — github.com/m0nds/medicore-api · Solo Backend

- Production clinic management API — AES-256 encryption, 4-role RBAC, immutable audit logs, Socket.io, Bull queues, 937 req/s load tested. Stack: Node.js · TypeScript · PostgreSQL · Redis · Docker · Jest

TECHNOLOGIES

Frontend: React.js, React Native, Next.js, TypeScript, JavaScript, HTML5, CSS3, Vue.js
Backend: Node.js, Express, PostgreSQL, Prisma, Redis, Socket.io, Bull, Docker, REST APIs, JWT, bcrypt
State & Data: Redux Toolkit, TanStack Query, TanStack Router, TanStack Table, Zustand, SWR, Context API
Styling: Tailwind CSS, shadcn/ui, Styled Components, SCSS/SASS, GSAP, Framer Motion
Testing & DevOps: Jest, Supertest, React Testing Library, Cypress, k6, GitHub Actions, Docker, Vite, Zod, Helmet

EDUCATION

MSc Construction Information Technology Engineering · Budapest University of Technology and economics, Budapest, Hungary
Sep 2026 – Jan 2028

BSc Building Technology · University of Lagos, Lagos State
Feb 2019 – Aug 2025
