SUMMARY

Frontend Developer with 4+ years of experience building scalable, performant web applications and enterprise SaaS platforms. Specialized in React.js, TypeScript, Redux, and complex state management. Proven ability to architect large-scale applications, optimize performance, and implement real-time data synchronization. Delivered a 30% increase in engineering velocity by implementing reusable component structures and optimizing API workflows.

WORK EXPERIENCE

Frontend Developer, Stratsight (Strategy SaaS)

June 2024 - Present

- Architected MissionSync, an enterprise strategic planning SaaS platform with 190+ React components, 97+ pages, and 50K+ LOC using React 18, TypeScript, Redux Toolkit, and React Query.
- Developed dynamic role-based onboarding flows (CEO, C-Level, Manager) with real-time progress tracking and safe state invalidation patterns.
- Architected hybrid state management combining Redux and React Query, enabling real-time updates without page refreshes and eliminating 100% of manual refresh requirements.
- Built AI-powered mission suggestion features with multi-step flows, file upload support, and comprehensive error handling.
- Integrated dual API versioning (V1/V2) with centralized error handling and automatic token refresh for backward compatibility.
- Built scalable UI component library with 190+ reusable components using Tailwind CSS, accelerating feature rollout by 30%.
- Created reusable custom hooks for complex data fetching, reducing code duplication across 15+ components by 40%.
- Led frontend architecture improving load times by 25% through code optimization and caching strategies.
- Deployed production applications via Netlify with Vite, PostHog analytics, React Secure Storage, and comprehensive error boundaries.
- Used @testing-library/react for component rendering and interaction tests.

Software Developer, Simonsaysdrip

Nov 2023 - April 2024

- Developed full-stack e-commerce features using React.js and PHP, building end-to-end customer journeys from browsing to checkout with payment integration.
- Achieved 95% Lighthouse performance score through image optimization, script bundling, and PWA features.
- Built comprehensive user account system with profile management, order history, wishlist, and personalized recommendations.
- Architected Shopify API integrations for product catalog, inventory management, and order processing with real-time synchronization.
- Implemented responsive design ensuring seamless experience across desktop, tablet, and mobile devices.

Frontend Developer, Bluelight Agency

April 2020 - January 2023

- Designed and developed responsive web applications for diverse clients using React.js, GSAP, and Framer Motion for rich interactivity.
- Built custom component libraries and reusable UI patterns, reducing development time by 25% through standardization.
- Enhanced UI performance by 20% through bundle size reduction, efficient rendering with React.memo, and lazy loading.
- Integrated RESTful APIs and third-party services including payment gateways, Google Analytics, and social media APIs.
- Managed Git workflows with feature branches, code reviews, and automated linting for code quality.
- Collaborated with design teams to translate Figma/Adobe XD mockups into WCAG-compliant implementations.

PROJECTS

MissionSync (mission-sync.com)

Enterprise Strategic Planning & Performance Management SaaS Platform.

Role: Founding Developer (70% of codebase contribution)

Beeva ai (beeva.ai)

AI-powered platform where users can upload a selfie that is analyzed to assess skin and care for it

Role: Architected and developed frontend applications using React and TypeScript

Bluelight studios (bluelight.studio)

Solving user problems through the use of software and technologies

Role: Developed and delivered multiple production web applications tailored to client specifications and user requirements

Folawej Laundromat (folawej.com)

World-class laundry experience with self-service facilities, coin-operated machines, and mobile app integration

Role: Maintained frontend codebase with continuous feature integration and updates

TECHNOLOGIES

- **Frontend**: React.js, React Native, Next.js, TypeScript, JavaScript, HTML, CSS, Vue.
- **State Management**: Redux Toolkit, Redux Persist, React Query (TanStack Query), Zustand, Context API, Custom Hooks Pattern, SWR
- **Styling**: Tailwind CSS, Styled Components, SCSS/SASS, CSS Modules, GSAP, Framer Motion
- **Tools & Testing**: Vite, Webpack, Git, React Axios, GraphQL, Rest APIs, Zod, WebSockets, Cypress, Jest, React Testing Library, Netlify.
- **CI/CD & DevOps**: GitHub Actions, Netlify CI/CD, Vercel Deployment, Docker Basics

EDUCATION

Bachelor of Science in Building

University of Lagos, Lagos state

Feb 2019 - Aug 2025

Bachelor of Science in Computer Science

University of People, California

Dec 2021 - Dec 2026
